Avant: 272M

The screenshot shows the OpenAlex search interface. At the top, there is a search bar with the text 'Search OpenAlex'. Below it, a blue banner reads 'Data Version 2 is live! Learn more here.' The search results section shows 'No filters applied' and a 'Stats' box that displays '272,400,000 results'. The search term 'xpac' is visible in the top right corner of the search area.

Maintenant: 465M (incluant "xpac")

The screenshot shows the OpenAlex search interface after an update. The search results section now shows '465,100,000 results' in the 'Stats' box. The search term 'xpac' is now highlighted with a checkmark in a box in the top right corner of the search area, indicating it is included in the results.

Vive le Works-magnet!

The screenshot displays the Works-magnet web application. At the top, the logo 'Works-magnet' is visible. Below it, there are navigation links: 'Home', 'Search raw affiliations and ROR in OpenAlex', and 'See results and make corrections'. A search bar contains the text '0 selected affiliations / 8821'. To the left, there are filters for 'Selected years' (Start: 2024, End: 2024) and 'Searched affiliations' (University of Florida). The main content area shows a list of search results for 'university of florida'. Each result includes the affiliation name, a list of works with their OpenAlex IDs and links, and a 'show more works' button. To the right of each result is a 'ROR' icon and a URL: 'https://ror.org/02y3ad647'. The results are for various locations: 'university of florida', 'university of florida gainesville fl usa', 'university of florida gainesville usa', 'university of florida usa', and 'university of florida gainesville fl'.

Données ouvertes et pérennes

via Zenodo

The screenshot shows the Zenodo dataset page for 'OpenAlex Snapshot'. The page header includes the Zenodo logo and a navigation menu. Below the header, it states 'Published October 16, 2024 | Version v1' and provides buttons for 'Dataset' and 'Open'. The title 'OpenAlex Snapshot' is prominently displayed. The authors listed are Jason Priem, Heather Piwowar, Barrett, Justin, Demes, Kyle, McCafferty, Nolan, Meyer, Casey (Contact person), Orr, Richard, and Portenoy, Jason. A 'Show affiliations' button is located below the author list. The main text describes OpenAlex as an open, comprehensive index of scholarly papers, citations, authors, institutions, and journals, available through API and UI. It includes a citation instruction: 'When citing OpenAlex, don't use this record. Instead, use: Priem, J., Piwowar, H., & Orr, R. (2022). OpenAlex: A fully-open index of scholarly works, authors, venues, institutions, and concepts. ArXiv. <https://arxiv.org/abs/2205.01833>'. A 'Notes' section contains a citation template: 'Cite as: Priem, J., Piwowar, H., & Orr, R. (2022). OpenAlex: A fully-open index of scholarly works, authors, venues, institutions, and concepts. ArXiv. <https://arxiv.org/abs/2205.01833>'. The 'Files' section shows a zip file 'snapshot-csv_10_2024.zip' and a folder 'csv-files' containing three files: 'authors.csv.gz' (3.6 GB), 'authors_counts_by_year.csv.gz' (1.3 GB), and 'authors_ids.csv.gz' (689.2 MB).

Code open source

The screenshot shows the GitHub profile for 'OurResearch'. The profile header includes the organization name, a bio, and social links. Below this, there is a 'Pinned' section with six repository cards: 'unpaywall-extension', 'oadol', 'depsy', 'impactstory-tng', 'paperbuzz-api', and 'citesa-api'. Each card shows the repository name, language, and star/fork counts. Below the pinned section is the 'Repositories' section, which lists several repositories with their respective details, including 'unpaywall-website', 'oadol', 'openalex-docs', 'openalex-corrections-api', and 'openalex-puts'. Each repository card includes a small line graph showing activity over time.

The Principles of Open Scholarly Infrastructure

ADOPTERS ABOUT / FAQ DISCUSSION

The Principles of Open Scholarly Infrastructure

POSI version 2.0 released October 2025 The POSI [Adopters](#) reviewed the version 1.1 principles and consulted with the community to create version 2.0, released in October 2025. The new/always-current version is below.

Previous POSI versions

- [version 1.1 from 2023](#). Marked up changes from version 1.1 to 2.0 with explanations ([PDF](#))
- [version 1.0 from 2015](#). Marked-up changes from version 1.0 to 1.1 with explanations ([PDF](#))

Governance

- **Coverage across the scholarly enterprise** – research transcends disciplines, geography, institutions, and stakeholders. Organisations and the infrastructure they run need to reflect this.
- **Stakeholder governed** – a board-governed organisation drawn from the stakeholder community builds confidence that the organisation will make decisions driven by community consensus and a balance of interests.
- **Non-discriminatory participation or membership** – we see the best option to be an “opt-in” approach with principles of non-discrimination and inclusivity, where any relevant group may express an interest and should be welcome. Representation in governance must reflect the character of the community or membership.
- **Transparent governance** – to foster trust, the processes and policies for

and Moore Foundation

Grants (all)

An increasing number of researchers are sharing their grant proposals openly. They do this to open up research so that all stages of the process can benefit from better interaction and communication and to provide examples for early career researchers writing grants. This is a list of 299 of these proposals to help you find them.
